

Hello friend! Welcome to **Smart-Saathi**, your free study helper! We're here to make learning easy and fun, just like a game. Let's see how we can start learning together.

1. How to Start (Sign-Up and Sign-In) 🙌

The first step is like finding your seat in the classroom. We need simple details so we can give you the best lessons.

A. If you're New (Sign Up) 📝

1. On the first screen, choose the '**New Friend**' or '**Sign Up**' button.
2. **Your Full Name:** Write your full name. This name will be printed on your winning certificates!
3. **Your Age** and **Your Class (Grade):** Choose how old you are and which class you study in from the list.
4. **A Secret Name (Username):** Choose a simple, easy-to-remember name for yourself.
5. **A Secret Code (Password):** Choose a secret code. Keep this safe!
6. Click '**Make Account**' or '**Create Account.**'
 - *We use your age and class to find the best lessons for you, so don't worry about choosing a subject right away!*

B. If you've been here before (Sign In) 😊

1. Choose the '**Welcome Back**' or '**Sign In**' button.
2. Type your **Secret Name (Username)** and **Secret Code (Password)**.
3. Click '**Let's Start!**'

2. Your Learning Place (Home Screen) 🏠

This is your personal space where you can see all your progress.

What it is	What it tells you
Progress Bar (Like a blue line)	How much of your whole syllabus you've finished.
Lessons Done	The total number of video lessons you've watched from start to finish.

Badges (Your stars)	The number of prizes (badges) you've won for doing a good job.
Next Lesson for You	The app suggests the next video lesson you should watch to continue learning.
Look for Subjects	Quickly find all your school subjects like Math, Science, and English.

3. How to Learn (Lessons and Videos) 🎬

We make learning easy by breaking big topics into small, simple videos.

Finding Your Lessons

1. Go to the '**Subjects**' button.
2. Select your **Class** (Grade).
3. You will see big subjects (like Math). Inside, there are small **Topics**.
4. Each topic has **Short Video Lessons** that are easy to understand.
 - *The app sometimes suggests topics from other subjects, too! This is so you can become even smarter.*

Watch Anytime, Anywhere 🌐

This is the most important part for you!

- **Short Videos:** Lessons are short, like a song, so you don't get bored.
- **English Words:** The videos have **English words written below** (subtitles) to help you understand better and learn new words.
- **Download and Watch Without Internet:**
 - Next to every video, you'll see a **Download button** (like an arrow pointing down).
 - Click it to save the video.
 - Once saved, you can watch it again and again, **even if your internet or Wi-Fi is OFF!** 🎉

4. Play and Win (Quizzes and Prizes) 🏆

Learning is like a game! The more you play, the more you win.

A. Quick Quizzes 🤔

- After you finish a video, there's a small quiz to check if you remember everything.
- Answer all the questions correctly, and we'll unlock the **next lesson** for you.

B. Badges and Certificates 🏆

- **Badges:** You win a digital badge for special achievements—like getting a perfect score on a quiz or finishing five lessons! These are your digital stars.
- **Certificates:** When you finish a whole subject (like all of Math for your class), we give you a beautiful **Certificate of Completion** with your name on it.

C. Leaderboard 🌟

- Every time you finish a quiz or a lesson, you get **points**.
- The **Leaderboard** shows who has the most points in the community. Can you get to the top?

5. Help for Your Future (Scholarship Hub) 💰

We also want to help you get help for your studies!

- **Scholarship Hub:** This section has a list of **money help** (scholarships) that the government offers to students like you.
- **Information:** We tell you who can apply and what papers you need.
- **Alerts:** We send a message when a new scholarship is starting so you don't miss it!

Happy learning! If you have any trouble, ask your parents or a teacher for help with this guide.
